Noam Chomsky Linguistics

Noam Chomsky (; born December 7, 1928) is an American linguist, philosopher, cognitive scientist, and activist. He is an Institute Professor and Professor (Emeritus) in the Department of Linguistics & Philosophy at MIT, where he has worked for over 50 years. Chomsky has been described as the "father of modern linguistics" and a major figure of analytic philosophy. His work has influenced fields such as computer science, mathematics, and psychology. Chomsky is credited as the creator or co-creator of the Chomsky hierarchy theorem, the universal grammar theory, and the Chomsky-Schütztenberger theorem. Ideologically identifying with anarchism and libertarian socialism, Chomsky is known for his critiques of U.S. foreign policy, and he has been described as a "revolutionary" political ideologue. As you such as.

Chomsky proposes a reformulation of the theory of transformational generative grammar that takes recent developments in the descriptive analysis of particular languages into account. Beginning in the mid-1950s and elaborating largely from MIT, an approach was developed to linguistic theory and to the study of the structure of language that has been influential in formalizing and developing the theory of generative grammar.

Aspects of the Theory of Syntax - Noam Chomsky - 1960-03-15

Chomsky proposes a reformulation of the theory of transformational generative grammar that takes recent developments in the descriptive analysis of particular languages into account. Beginning in the mid-1950s and elaborating largely from MIT, an approach was developed to linguistic theory and to the study of the structure of language that has been influential in formalizing and developing the theory of generative grammar.

In The Ideological Structure of Linguistic Theory Geoffrey J. Hock and John A. Goldsmith provide a revisionist account of the development of ideas about semantics in modern theories of language, focusing particularly on Chomsky's very public rift with the Generative Semanticsists about the concept of Deep Structures.
